

DRUMBASE®

ATP® DRUM KIT LINE

Image of 197x197x2.7cm model Ref.:DB and the carrying-bag.

FEATURES

- Anti-vibration platform.
- Packaging: 1 kit (9 pieces)
- Installation: by embedding; Use: live and studio.
- Fits the standard size of stage platforms.
- Manufactured with 60% recycled material.
- Provided with carrying-bag.
- Other sizes available on demand.

SIZES AND COLOURS

MODELS	HEIGHT	WIDTH	DEPTH	WEIGHT
DB ●	197 cm (77.6 in)	197 cm (77.6 in)	2.7 cm (1.1 in)	26 Kg (57.32 lbs)

DESCRIPTION

The ATP® DRUMBASE® is an anti-vibration platform for drum sets which is composed of 9 pieces that fit together and make up a total area of 4m² (2mt x 2mt).

The material used in its base is non-skid, closed-cell, made of recycled rubber, and its density is duly adjusted. In order to exert the best inertia on the physical propagation of energy, we took into account the weight of both the instrument and the musician, as well as the weight of the reverberated movements that are made when the musician is playing.

It is easily mounted by fitting together the several modules on the floor or the stage. It just takes two minutes for your DRUMBASE® to be ready. The 9 modules fit together in a perfect way, thereby preventing them from getting separated due to oscillations during performance. It has a carpet finishing.

The DRUMBASE® is a great tool to optimise the sound of your drum kit and is excellent to be used at live or in studio.

We offer a carrying-bag and a pencil to mark the position of the several pieces that are on the platform

KICK PAD® KIT

ATP® DRUM KIT LINE

Image of the KICK PAD KIT® (inside) the KICK PAD. Ref.:KP and the PUNCH MASTER. Ref.:PM (outside).

FEATURES

- Kit includes: KICK PAD® and PUNCH MASTER®
- Making the beat clearer. Full-bodied and more defined sound.
- Cancel unwanted harmonics. Lowers the bass drum resonance frequency.
- For all bass drums from 14" and 20" depth.
- For Live or Studio performances.
- Very useful for the drummer and the sound engineer.

SIZES AND COLOURS

MODELS	HEIGHT	WIDTH	DEPTH	WEIGHT
KP ●	5 cm (1.97 in)	2x 35 cm (14.0 in)	35/50 cm (14/20 in)	0.6 Kg (1.32 lbs)
PM ●●	14 cm (5.5 in)	14 cm (5.5 in)	4 cm (1.8 in)	0.1 Kg (0.22 lbs)

DESCRIPTION

To tune and get good sound out of a bass drum is sometimes a very hard task as an essential base of a drum kit needs to be properly treated.

The KICK PAD KIT® was created to absorb unwanted harmonics which are out of tune with the bass drum note, thus making the beat clearer, full-bodied and more defined.

Composed of two parts; PUNCH MASTER® is the front drumhead port and KICK PAD® which is the inner absorbent pad. These are provided together allowing you to fully control the bass drum head's vibration accentuating its punch and deepness at every beat. Its ultra light material and attractive design makes it look distinct and stylish.

KICK PAD KIT® is very useful for the drummer and the sound engineer, providing great results either in live or in studio performances.

IMPORTANT NOTICES

- JOCAVI® accepts no responsibility for any printing errors. Specifications can be modified without prior notice, if technical or commercial reasons so require.
- The colours shown on this catalogue are only a reference and an illustration of the products finishing. The colours shown are not binding because brightness, contrast and colour balance may vary due to the printing process.
- Colours may vary due to raw-material suppliers' changes and some differences may occur in total range. Sizes may vary slightly due to their production method and some inherent raw-materials characteristics.
