

| WALLPERF |

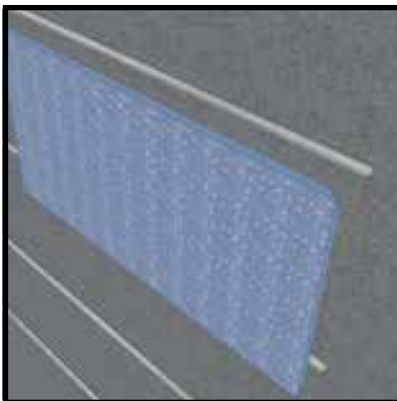

Previously the existent wall and check if and what cuts and adjustments will be needed (for electric sockets and others) to have a well-finished wall .

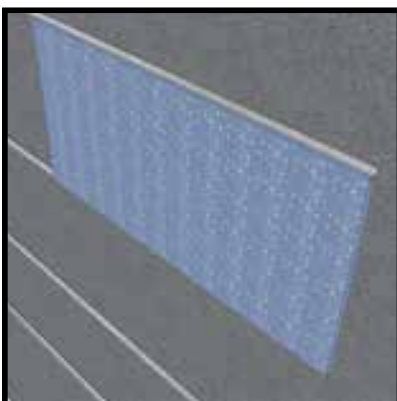

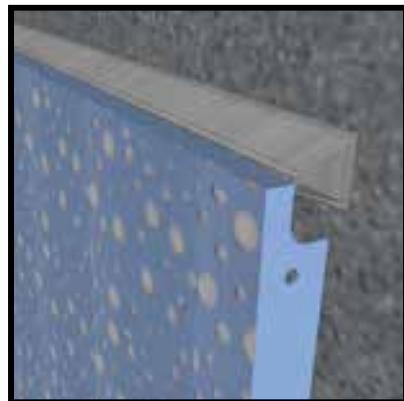

The WallPerf® plates can be installed either horizontal or vertical, depending on project requirements.

For ceilings, the WallPerf® plates can be installed on standard T-Ceiling structures.

Measure, mark, cut and screw the optional mounting metallic bars* (sold separately) onto the wall as shown and accordingly to project requirements.

After the mounting bars are properly verified for spacings and securely installed.

Fit each panel onto the mounting bars by carefully applying some pressure to the panel as needed, while protecting front surface finishings. Do the same for the remaining panels as shown.
